Notification of Wuhan Municipal Health Commission on pneumonia caused by new coronavirus infection

Current position: Home >> News Center >> Publication Notice

Issuing authority: Wuhan City health committee | Published: 2020-01-20 02:42:40 | Hits: 114 516 | Font Size: [Tai](#) [Zhong](#) [Small](#)

From 0-24:00 on January 18, 2020, 5 cases were cured and discharged, 59 new cases were added, and 1 case died; from 22:00 on January 19, 1 case was cured and discharged, and 77 new cases were added.

On the basis of continuously standardizing the operation of pre-inspection and triage and fever clinics at all levels and ty of medical institutions, our city has further increased the screening of suspected cases of pneumonia caused by new coronavi in accordance with the newly revised pneumonia diagnosis and treatment plan for new coronavirus infection. At the same ti we will further improve the testing plan, optimize the testing process, and accelerate the testing speed. National, provincial ; municipal expert groups conducted comprehensive research and judgment based on clinical manifestations, epidemiologi history and etiological test results. 59 new confirmed cases of pneumonia with new coronavirus infection were newly identifi on January 18, and new coronavirus infection was newly identified on January 19 There were 77 confirmed cases of pneumoi and a total of 136 new cases were confirmed in the two days.

Among the 136 patients, 66 were males and 70 were females; the youngest was 25 years old, and the oldest was 89 years (the onset date was before January 18, 2020; the first symptoms were mostly fever, cough or chest tightness, and dyspr According to the newly revised diagnosis and treatment plan, the patient's condition is classified according to mild, severe, ; critical. Among them, 100 cases are mild, 33 are severe, and 3 are critical (including 1 death). The epidemiologi investigations related to the new cases are being conducted in depth, and their close contacts are also being tracked.

As of 22:00 on January 19, our city has reported a total of 198 cases of pneumonia infected by the new coronavirus, 25 ca have been cured and discharged, and 3 cases have died. 170 cases are still being treated in the hospital, of which 126 are mild, are severe, and 9 are critically ill. They are all treated in isolation at designated medical institutions in Wuhan. A total of 8 close contacts have been tracked, 727 people have been released from medical observation, and 90 people are still under medi observation. Among the close contacts, no related cases have been found. We will continue to conduct timely sampling ; testing of newly discovered suspected cases.

pneumonia. Experts suggest that citizens should pay attention to cold and warm, indoor ventilation and personal hygiene, strengthen physical exercise, maintain a light diet, and avoid activities in crowded places. When coughing or sneezing, wear a mask or cover your mouth and nose with tissues and clothes to reduce the spread of germs. Pay close attention to symptoms such as fever and cough. Seek medical attention if such symptoms occur.
